

Maryland/Delaware Master Logger 2011 Directory

The Master Logger Program helps loggers meet the ever-increasing demands of the logging profession. The courses provide information about current environmental regulations, forestry principles, and safe work practices. Becoming a Master Logger publicly demonstrates an understanding of safe, environmentally and economically sound timber harvesting practices. The Maryland/ Delaware Master Logger Program also works to raise public awareness

of the professionals harvesting trees – one of the region's important renewable resources.

This directory showcases MD/DE Active Master Loggers, who have completed the 16-hour core training program and have met the program's continuing education requirement of 8 credit hours every two years. When available, the listing includes the counties in which the logger is willing to work.
